COMPILED FROM THE OFFICIAL RECORDS

ADOPTED BY THE COMMON COUNCIL.

LAIN & CO., PUBLISHERS,

213 Montague Street, Brooklyn.

Showing the commencement and termination of each Street, Avenue, Place, Lane, Court, etc., in the City, together with corner numbers of every intersecting street or avenue.

### EXPLANATIONS.

If you desire to ascertain the location of any number—for instance, No. 250 Nevins street—you will observe that No. 240 Nevins is on the corner of Douglass, right side, and No. 256 Nevins is on the corner of Degraw, hence the desired location of No. 250 Nevins street is between Douglass and Degraw, on the right side.

Or, suppose you wish to take a car for the purpose of reaching, as nearly as possible, No. 569 Willoughby avenue. The Street Directory shows (see Willoughby avenue) that No. 511 Willoughby avenue is on the corner of Marcy avenue, and No. 581 is corner Tompkins avenue, both on the left side, so that to reach No. 569 Willoughby avenue, you will leave the car at either Tompkins avenue or Marcy avenue.

Even numbers will be found on the right side, odd numbers on the left.

A † placed in the right or left column denotes that the street or avenue does not extend to that side.

A — denotes that there is no number on the corner.

# Shepard's Argand Base-Burner Furnace.

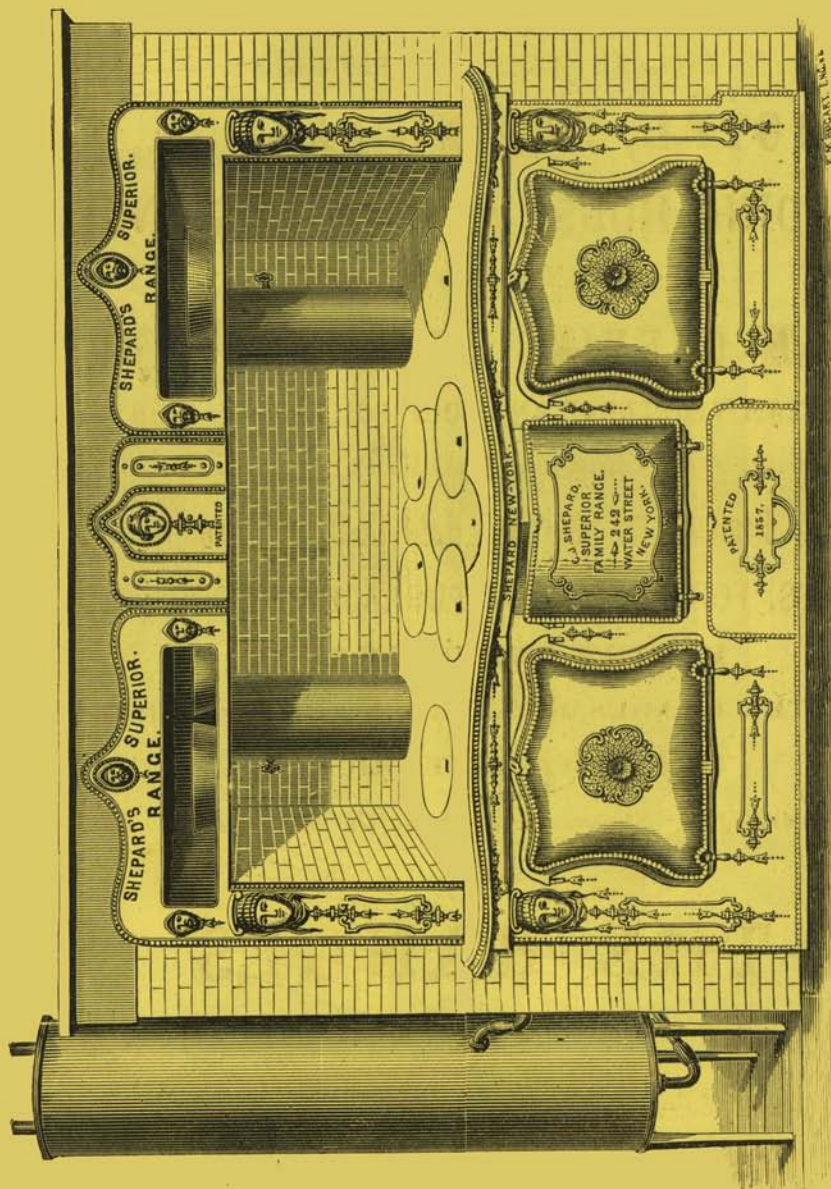

Shepard's Argand Base-Burner Furnace very completely consumes those volatile gases generated from coal, which in most furnaces constantly pass unconsumed to the chimney, with the consequent utter waste of fuel. It needs only to be seen under combustion to assure the observer of this important fact. It is admitted, by those who have examined and have them in use, that it is the most complete adaptation of the real science of combustion to useful purposes, combining less waste of fuel with great economy. Three sizes for brick setting, and three in portable form.
